OBJECTIVE

Newly graduated web developer offering enthusiasm and understanding of Front-end frameworks like React, Redux and advanced CSS techniques. Looking to join an organization where the opportunity for growth and personal development is embraced.

SKILLS

- *Languages:* HTML5, CSS3, JavaScript (ES6), C++, Python.
- *Frameworks/Libraries:* Flex Box, CSS-Grid, jQuery, React/Redux, Node.js, MongoDB, Webpack, Jasmine, Jest, Responsive Design, Accessible Design.
- *Others:* Git/GitHub, Photoshop.

PROJECTS

When in Mumbai – Udacity Front End Nanodegree | [Live Demo](#)

A location-based website geared towards showing the best places to visit and experience when you come to Mumbai.

- Used the Google Maps API, Foursquare API and React framework to design a single page app that shows top locations to visit in Mumbai.

Bookish – Udacity Front End Nanodegree | [Live Demo](#)

A Bookshelf management website that lets the users keep track of their favourite books.

- Used the Udacity books API to fetch books and add them to any of the three bookshelves which are “Currently Reading”, “Want to read” and “read”.
- Shelves are changing using the React State and books are moved between shelves using a dropdown

Pocket Money | [Live Demo](#)

An expenses management website that lets the users make detailed notes about their expenses.

- Designed a redux store to create, edit, remove and filter expenses paired with a minimalistic UI made using React and SASS.
- Used firebase as the backend service to store user’s expenses data and also provide authentication.
